OBJECTIVE

I am a beginner web developer who is learning HTML, CSS, and JavaScript. I enjoy building websites and improving my skills by doing small projects. I have created a portfolio and a watch website. I am interested in web development and want to learn more by working on real projects and being part of a good team.

Frontend Development: Html, CSS, JS

Backend Development: Dotnet

PROJECTS

✓ Enhancing object detection in assistive system

Tech skills- Python, Java Script, Machine Learning

This project improves object detection using AI to help users identify objects in real time, mainly for assistive purposes like helping visually impaired people.

- Developed an assistive system using object detection techniques.
- Identified and detected real-time objects using computer vision.
- Improved accuracy and response time for object recognition.
- Designed a user-friendly system to assist visually impaired users.

✓ Watch E-Commerce Website

Tech Skills - HTML, CSS, Web Design, Responsive Design, VS code Editor

- Homepage with featured product section
- Product listing with images, names, prices
- Basic navigation bar with logo and menu links
- Responsive design for mobile and desktop
- Clean and user-friendly layout

EXPERIENCE

Dec 2025 - March

✓ ICL Service Solution(Full Stack-Intern)

I Worked as a Web Development Intern at ICL Service Solutions, where I designed and developed an E-commerce Sales Dashboard. Collected and analyzed sales data to create interactive dashboards for better business insights. Used web technologies like HTML, CSS, and JavaScript to build user-friendly interfaces.
